

YOUR TOTAL BIOMASS PELLETING SOLUTION

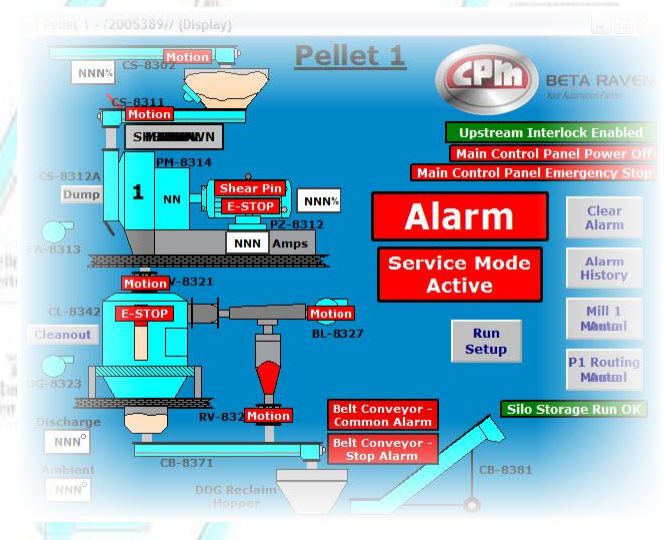

CPM is more than just a supplier of machines. Our specialized and highly qualified engineers have technological expertise and years of experience. Working with you, they can help you save energy, decrease wear and tear on parts and increase product consistency. We will create a total process solution to help increase your profits.

CPM Bio Mass system solutions offer the latest design and concepts in production, product quality and energy savings.

CPM has combined the latest engineering, automation and manufacturing technologies to provide the highest quality Bio Mass Systems in the world. The result: the best production levels ever achieved with excellent pellet quality. We offer process solutions with quality equipment for grinding, conditioning, pelleting, cooling, sifting and automated controls. Not only does CPM have the equipment, we have the knowledge and experience to make your pellet plant as cost effective as it can be.

For virtually every processing application, CPM is Your Partner in Productivity, the partner you can trust for total processing and production solutions.
